### **Supplier declaration on per- and polyfluoroalkyl substances (PFAS)**

Per- and polyfluoroalkyl substances (PFAS) are to be strictly regulated by law in the EU and worldwide due to their particularly persistent and sometimes toxic properties. Their use would then only be possible in very few, well-justified exceptional cases.

**Based on the information provided by our suppliers, we confirm that the printed circuit boards supplied by us do not contain any PFAS substances.**

Irrespective of this, we consistently monitor compliance on the part of our suppliers in our own interests and to ensure a high level of product safety.

We are in close communication with the manufacturers of the raw materials and supplies we use and will integrate the pre-registration or later registration of the relevant substances into our supplier qualification.

*The information in this declaration is based on our current knowledge and experience and on information provided by third parties. Any liability or warranty for factors outside our knowledge and sphere of influence is excluded.*
